## Overview

*TRN bridges global communications through new media and digital technology to most effectively serve today's mobile families & lifestyles. TRN Internet Television and Internet Radio Portals stream programs provided by individuals, producers, ministries, faith congregations, businesses and organizations. These programs are then digitally streamed over TRN Live, Featured and On Demand streaming portals.*

*In this capacity TRN acts as a "Curator," one that gathers niche programming that is then accessed from one central location:  
<http://TRN.tv>*

*TRN Premiere Channels and TRN Anchor Networks provide options for private or custom network portal access.*

*TRN's platform reaches audiences around the world over multiple media channels and devices including; the Internet, mobile phones, personal hand held devices, tablets, out of home media, digital terrestrial and satellite transmissions.*
